

11. (New) An electric vehicle according to claim 2, wherein when the  
brake pedal is stepped on under a condition that the vehicle body is at a stopping  
position by the rotating torque of the electric motor, the rotating torque is  
decreased and a quantity of motion of the electric vehicle is measured, and the  
electric vehicle is again brought at the stopping position by the rotating torque  
when said quantity of motion exceeds a preset value.

REMARKS

Entry of the above amendments before examination of the application is  
respectfully requested.

If there are any questions regarding this amendment or the application in  
general, a telephone call to the undersigned would be appreciated since this  
should expedite the prosecution of the application for all concerned.

If necessary to effect a timely response, this paper should be considered as  
a petition for an Extension of Time sufficient to effect a timely response, and  
please charge any deficiency in fees or credit any overpayments to Deposit  
Account No. 05-1323 (Docket #381NT/44743TCO).

Respectfully submitted,

March 7, 2002
